

# PERMANENT WATERPROOFING SYSTEM

(RESIDENTIAL • INDUSTRIAL • COMMERCIAL)

WATER, MEET YOUR MATCH.

**PENETRON**<sup>®</sup> is an integral capillary waterproofing system that creates an insoluble crystalline web that grows deep into the pores and cracks of concrete, making it permanently waterproofed .

## Main features

- More effective than membrane
- Cannot come apart at the seams, tear or puncture
- Can be applied to new or old concrete
- Can be applied from any side of the concrete
- Increases concrete strength
- Resist chemical attack, including sea water
- Protects reinforcing steel from corrosion
- Resists high hydrostatic pressure
- Seals cracks
- Easy to apply

## PENEBAR

Rapid Hydrophillic  
Expansion Waterstop
